

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

PREFACE TO VOLUME III.

THE Publication of a Third Volume of the School Register, following the Second after so short an interval, may perhaps need some words of explanation. The Editor trusts that it will be sufficient to say, that the prospect of a new Edition of the whole Register being very distant, it has been felt by those who asked him to undertake the work, that the sooner each section of the ever-growing list could be worked up, the better would be the chance of keeping in view the careers of those included in it, and the broader would be the foundation laid for a future revision.

This assumption has certainly been confirmed by the experience gained in editing the present Volume. The difficulty of re-opening communication with many of those who entered the School even so recently as from 1874 to 1887 has been very great, and is very imperfectly represented by the absence of full Notes to so many of the names. It should be stated that the Publisher has spared no reasonable expense in endeavouring to reach by circulars every individual concerned. But the percentage of those whom circulars did not reach, or who did not respond to them, and whose entries had to be compiled by the Editor, was far higher than might have been expected.

With regard to the Title and Form of the Volume it must be understood that the Revision consists in replacing, where possible,

by full names the initials by which alone the majority of Parents have been registered; in adding changes of their rank or title; in inserting the letters O.E., followed by the dates of entering the School, when the Editor's attention has been called to the fact of their being themselves Old Rugbeians; in correcting mistakes in the names, and in stating the order of birth of the sons whenever this information has been supplied or could easily be obtained; and lastly in giving the date of leaving. In the Annotation the uniform plan has been followed of appending to each name the School, College, and other educational honours or distinctions; the entry upon any Profession or Business, with dates; and the present address or reference. An Athletic Record is also given a place in the Notes, but is strictly confined to School Events, and includes only Cricket Eleven, Football Fifteen, Shooting Eight, Racquet Pair, and the Crick Run. For the three former the abbreviations XI., XV., and VIII., are respectively used, an asterisk over any year denoting the position of Twelfth Man for Cricket, or its equivalent for Football or Shooting. The incorporation of the Notes in the Register itself and the consequent abolition of footnotes cannot but be a relief to readers.

The Editor has to thank many Old Rugbeians for valuable assistance, and hopes to have an opportunity of doing so more explicitly in another place.
